**Witt to Debut “News” At ISSA Booth #1915  
Multiple New Products for Jan/San Industry Introduced at Key Industry Event**

Cincinnati, OH – Several new waste and recycling containers from Witt Industries will be unveiled in booth #1915 during the ISSA show in Orlando, Florida November 9-12, 2010. These durable and attractive metal containers combine functionality with aesthetics, making them ideal for the collection of paper, clear plastics, glass, compost and other recyclable materials. They are well suited for use within facilities such as schools and universities, stadiums, arenas, airport concourses, offices, concession areas, and more. Among the new products featured include

- The **SC35** – a perforated metal, 35-gallon waste or recycling container with plastic inserts and various lid configurations. An ideal size to compliment the larger SC55 perforated metal container, the SC35 is also available for custom laser logos,
- the **18RT-2H** - an 18-gallon capacity metal container for 2-stream recycling. This is the next model of the very popular 18RT-1H (one-stream) and 18RT-3H (three stream) recycling containers,
- the **10/1DT-BK** – a black metal recycling container with 20-gallon capacity. This is an economical recycling container now available in an attractive black color,
- the **415DT-BL** – a blue metal recycling container with 15-gallon capacity – includes a domed top. This converts the widely used black domed top container into an attractive blue recycling container,
- the **AL18CLR** – an attractive decorative brushed aluminum recycling container and
- the **5/1DTBL and 5/1 STBK** – 49.6 quart metallic recycling containers with round or slotted lids. This recycling container allows for recycling under desks and many other tight space areas.

“We’re excited to be unveiling such a wide array of new products to the Jan/San marketplace” says Witt President Tom Dorger. “We’ve been working with distributors and end customers to develop products that fill needs within this key industry. The number, variety and functionality of new products clearly demonstrate the importance of this segment – and our willingness to address needs within it.”

Witt Industries is a woman owned manufacturer of a full range of metal waste and recycling receptacles for indoor or outdoor environments. Combining functionality with aesthetics, these high quality receptacles serve as site furnishings because they enhance the surrounding décor. Witt Industries products are used in many commercial and institutional settings including hotels and motels, commercial office lobbies and atria, hospitals, casinos, schools, restaurants, stadiums, arenas and more.
